We weren't sure if it all sounded too good to be true but thought it would do no harm to find out. The paperwork was straightforward and informative. We were delighted to hear within about 10 days that we were due a refund of approx £2500 which we received just a week or so later.

And as a bonus they managed to get the bond that we'd had to pay returned as well, another £2000 plus interest. I have no hesitation in recommending Utility Refund and will now be looking at other premises for them to audit.
